IDE –
IntelliJ, Visual Studio, Eclipse

Methodology –
Agile

Soft Skills

Good Communication, Fast Adaptability, Target Oriented, Problem-Solving Abilities.

Education

Bachelor of Computer Engineering:
University of Pune (2016 - 2020)

Summary

Experienced Full Stack Developer with over 2 years of hands-on experience building scalable services using event-drive architecture. Proficient in both front-end and back-end development, with a strong understanding of modern web development technologies and frameworks.

Experience

Software Developer, TechBulls SoftTech (2022 Sept - Present)

- Part of BillDesk's Autopay Platform team, building event-driven services responsible for fetching and generating invoice for specific merchants, automating payments with mandates, refunding in-case of multiple payments and notifying the consumers about their transactions with email and Gupshup messaging service.
- Implemented RESTful APIs maintaining security measures, and collaborated with partner teams to integrate APIs for payment.
- Implemented Refund Service, debugged problems & fixed bugs in various environment like QA, UAT & PROD.
- Implemented Swagger API across all services.
- Analysed Vulnerability Assessment and Penetration test (VAPT) and performance test results. Based on which enriched and optimised the code which enhanced API security.
- Managed a team of 3 developers, providing guidance and support in their tasks and ensuring timely delivery of the project.

Full Stack Developer, EduBrite Systems (2021 Jul - 2022 Aug)

- Built customized web pages using Velocity, Javascript aligning with the Learning Management System (LMS) product.
- Worked on a few in house features to enhance the LMS product using technologies like Java, JSP, JSTL Tags, Custom Tags, jQuery and MySQL.
- Led the team on making the learning management system accessible for a reputed IT firm.
- Worked on integrating a client's API into the LMS.
- Implemented custom and slds components by Salesforce for building customized websites.

Software Engineer, Persistent Systems (2020 Nov - 2021 Jun)

- Designed a new PowerApps Canvas Driven app.
- Implemented Solutions using multiple data sources (SharePoint, Excel, OneDrive).
- Developed Power Automate Flows and an Asset Management App which eliminates all the paper-work and handles all the approvals on MS Teams.
- Retrieved data from APIs in PowerApps.
